                                                                                                                                                                             Suzuki A., Kusakai G.-I., Kishimoto A., Lu J., Ógura T., Lavin M.F.,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   TISSUE SPECIFICITY: Expressed at high levels in heart and brain, and at lower levels in skeletal muscle, kidney, ovary, placenta, lung and liver.
SIMILARITY: Belongs to the Ser/Thr protein kinase family.
new cDNA clones from brain which can :ro.";
                                                                                                                                                                                                                                "Identification of a novel protein kinase mediating Akt survival signaling to the ATM protein.";
J. Biol. Chem. 278:48-53(2003).
-!- FUNCTION: Involved in tolerance to glucose starvation.
Phosphorylates ATM.
-!- CATALYTIC ACTIVITY: ATP + a protein = ADP + a phosphoprotein.
-!- ENZYME REGULATION: Activated by PKB/AKT1 during glucose
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               1;

-!- SIMILARITY: Belongs to the Ser/Thr protein kinase family.
-!- GAUTION: The sequence shown here is derived from an EMBL/GenBank/DDBJ whole genome shotgun (WGS) entry which is preliminary data.

/clone lib="Inh library was constructed according to Site 2: Not I; The library was constructed according to Bonaldo, Lennon and Soares, Genome Research, 6:791-806, 1996. Denatured mRNB was size fractionated on a 1% agarose gel. First strand cDNA synthesis was primed with an oligo-dT primer containing a Not I site. Double stranded cDNA was size selected according to mRNA size fraction, ligated with EOR I adaptor, digested with Not I, and then cloned directionally into pYx-Msc vector. The library tag sequence located between the Not I site and the polyh tail, is TGAGAGAGCC. This library was created for the University of Iowa Mouse Brain Molecular Amatony Project (BMAP): 'Gene Discovery in the Developing Mouse Nervous System', supported by National Instututes of Mental Health (NIMH), Hemin Chin, Ph.D., program coordinator."
